For RM250 a month, regular activities and three brand placements offer ongoing contact with a Japanese community in Malaysia.
Let people see your business as one that supports their community.

01 **Stay close to people your business serves.**

Regular play creates opportunities for people who may be interested in your products or services to become familiar with your name.

02 **Be known for supporting what they enjoy.**

Supporting a community that people choose to be part of may encourage familiarity and goodwill towards your business.

03 **Give people a reason to remember you.**

Repeated contact and visible community support aim to make your business easier to recall when people consider their options.

Improvements in brand perception, trust, enquiries or purchases are not guaranteed.
